

City Ranger 2250 Mulch Mower and Rotary Mower

The mulch and rotary mower gives perfect mowing results all year round. You decide whether to use it as a rotary mower with or without a grass collector or as a mulch mower. The rotary mower is used on high, coarse and even wet grass. The mulch mower cuts grass several times and fertilises by blowing the fine-cut grass into the soil. This prevents, for example, the growth of moss and eliminates the need to rake up the grass.

Changing to and from rotary mowing and mulch mowing is easy (special kits are available from all authorised Nilfisk Outdoor dealers). The machine can mow at speeds up to 12–13 km/h, handles slopes really well and is exceptionally easy to manoeuvre. It can get very close to tree trunks, under bushes and in between flower beds – and the operator has full visibility.

When you change attachments, the City Ranger 2250 hydraulic hoses are connected at the turn of a handle!

Technical data

Mulch Mower and Rotary Mower

Special features

Excellent weight distribution and stability between the utility machine and the implement

Quick return to floating position after lift

Seat with pneumatic suspension (optional) for extra comfort

Operator-friendly with adjustable steering wheel and seat

Quiet cab interior

The cutting guard has strengthened edges

Wheels with wide tread that leave less noticeable tracks in the grass

Cutting speed of up to 12–13 km/h

The mower can tilt up and rest on two support wheels – making cleaning and moving easy

Extra equipment

Top filter: We recommend using a top filter to increase air intake, as this will protect the engine by preventing the radiator from becoming blocked. Top filters are available at all authorised Nilfisk Outdoor dealers.

Mulch kit: The rotary mower can be changed into a mulch mower with a special kit, which is available from all authorised Nilfisk Outdoor dealers.

Grass collector kit: The rotary mower and mulch mower can be converted to a grass-collecting rotary mower, using a special grass collector kit available at all authorised Nilfisk Outdoor dealers.

Dimensions

Attached:

Length	2,830 mm
Width	1,285 mm
Height	1,960 mm

Storage dimensions:

Length	1,080 mm
Width	1,285 mm
Height	580 mm

Technical data:

Weight	100 kg
Cutting width	1,210 mm
Adjustable cutting-height	30–70 mm
Ground clearance below mower	100 mm
No. of mower blades	2
Cutting speed	
Tip speed	77 m/sec
Theoretical mowing area per hour	5–10,000 m ² /h

EU standard approved

CE certified according to EU Directive
