MotorScrubber™

SPLASH-GUARD SYSTEM

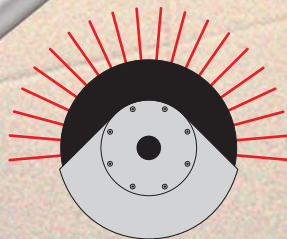

Splash-Guard Bracket + 2" Deflector for 2" Brushes + 6" Deflector for MS1048

Keep water, cleaning agents, and soap spray right where you want them ... where you're cleaning ... *not on your shoes and legs!*

The glass-filled nylon Splash-Guard Bracket easily attaches to the MotorScrubber head (see right).

The Splash-Guard System includes two removable, heavy-duty, Neoprene Deflectors for use with the MotorScrubber's standard 2" and 6" baseboard brushes.

200° "Work Zone" and 160° of Splash Protection!

Installation Instructions

Disconnect MotorScrubber from power supply. Unscrew and remove hub.

Unscrew Phillips screws that hold base plate to motor housing without removing base plate.

Attach Splash-Guard Bracket with base plate screws. Start one screw and then the opposite one. Tighten. Tighten remaining six screws in the same manner.

Attach velcro Deflector to bracket, starting in one corner and working to the other corner.

Re-attach hub.

Twist-lock brush to hub, reconnect power supply, and start MotorScrubbing ... splash-free!
